

The re-usable packaging system for endless application

Built for strength. Collapsible for convenience

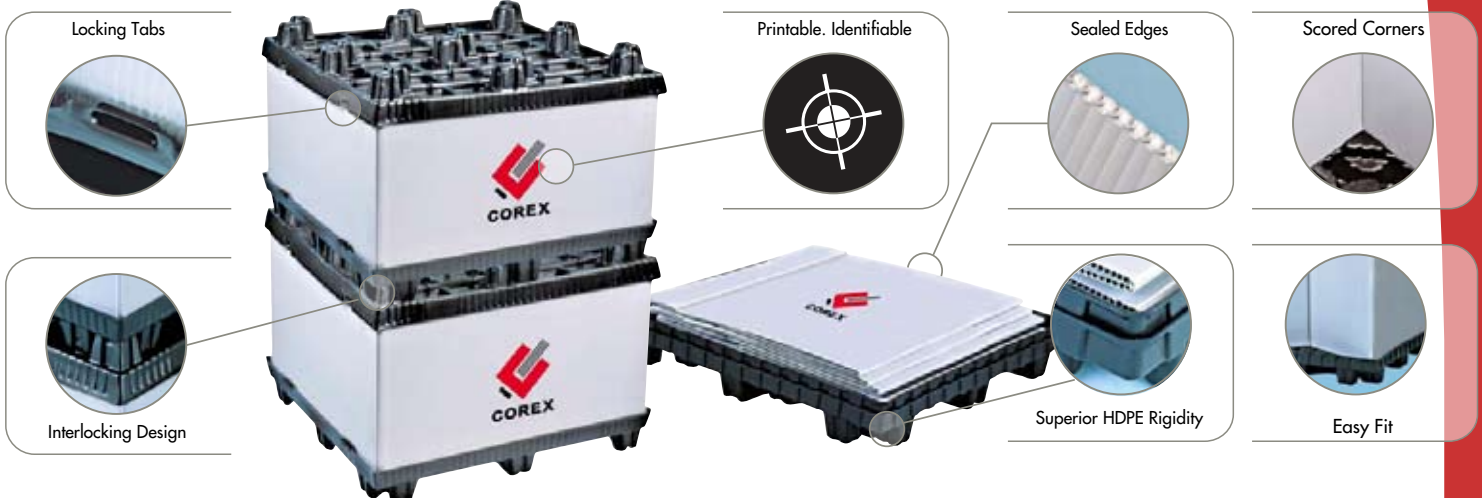

Corex Plastics manufacture and supply a complete range of **Corpak** bulk bin containers that combine Corex Fluteboard pallet liners with thermoformed plastic pallet bases and lids. Strong yet lightweight, the **Corpak** is collapsible, stackable, re-usable and the pallets nest into each other when empty.

Corpak containers are ideal for transporting and stocking fresh produce, manufactured components and finished goods. As a bulk bin materials handling system it can be designed to suit your needs. Corex will develop and design versatile plastic pallet and tray systems with liners that can be tailored to your individual companies requirements. This includes corporate colours and identifiable logos.

The combination of thermoformed HDPE pallet bases and lids and the Corex Polypropylene liners ensures that the **Corpak** delivers a durable, hard wearing and impact resistant Intermediate Bulk Container.

Corpak features include:

All **Corpak** polypropylene fluteboard liners are manufactured from food grade material and are water and mildew resistant, washable and recyclable. The additional feature of "sealed edge" flutes enables **Corpak** to be suitable for clean room environments where contamination issues are of concern.

The re-usable packaging system for endless application

Consider the advantages.

Copak bulk bin containers are ideal to move work-in-progress and finished goods in closed loop systems. **Copak** combines Corex Polypropylene Fluteboard in the form of pallet liners with a range of thermoformed plastic pallet bases and lids. Fibreboard liners are also available for the **Copak** System.

The Fluteboard liners can be designed either as:

[1] a complete stand alone unit OR [2] a collapsible unit that folds down and stacks into the pallet base, thereby minimising valuable warehouse space.

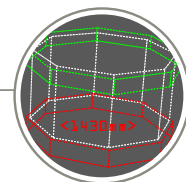

The Fluteboard liners can be supplied with or without “easy access” fold down doors. Corex’s “edge sealing” technology ensures dirt, dust and fibre contaminants are not transmitted into the work environment. In addition the overall design of these units can be custom designed to suit your specific requirements.

Container Solutions

Corpak Benefits

- Packaging cost savings
- based on trip returns
- Strength and durability
- Re-usability
- Stackable and collapsible
- Nestable
- Identifiable
- Four way fork lift access
- Lightweight
- Weather safe
- Clean and washable
- Locking tabs for stability
- Food grade materials

Standard Pallet construction

Pallets are available as a single or double skin construction.
